

RePET

Sustainable rCPET Trays

**CONTAINING THE VALUES OF FOOD**

# RePET

## Sustainable and Recyclable rCPET Trays

MCP RePET trays are made of up to 70%-80% recycled material sourced from post-consumer recycled (PCR) PET material, rCPET trays are fully recyclable, mono material recyclable as they are made of only one material - PET.

Colors may interfere with the sorting process during recycling. Therefore, MCP has expanded its tray colors catalog to include a variety of colors, which are infrared-detectable and easily and conveniently sorted and recycled at recycling plants.

Another sustainable solution MCP has developed is the manufacturing of non-pigmented trays. This eliminates the need to sort the used trays by color and provides high-quality recycled material that can be integrated seamlessly into a wide range of products.

Non pigmented trays are in line with the trend of transitioning to non-pigmented packaging and promoting sustainability and recycling worldwide.

**CIRCULAR ECONOMY**  
Continual use of plastic resources

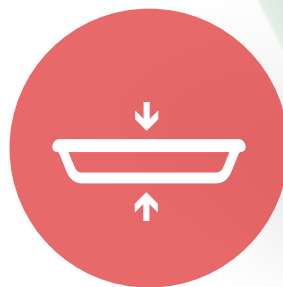

**RECYCLED PET**  
Made of average 70%-80% post-consumer recycled content

**IR DETECTABLE COLORS**  
Various IR detectable colors, including carbon black free

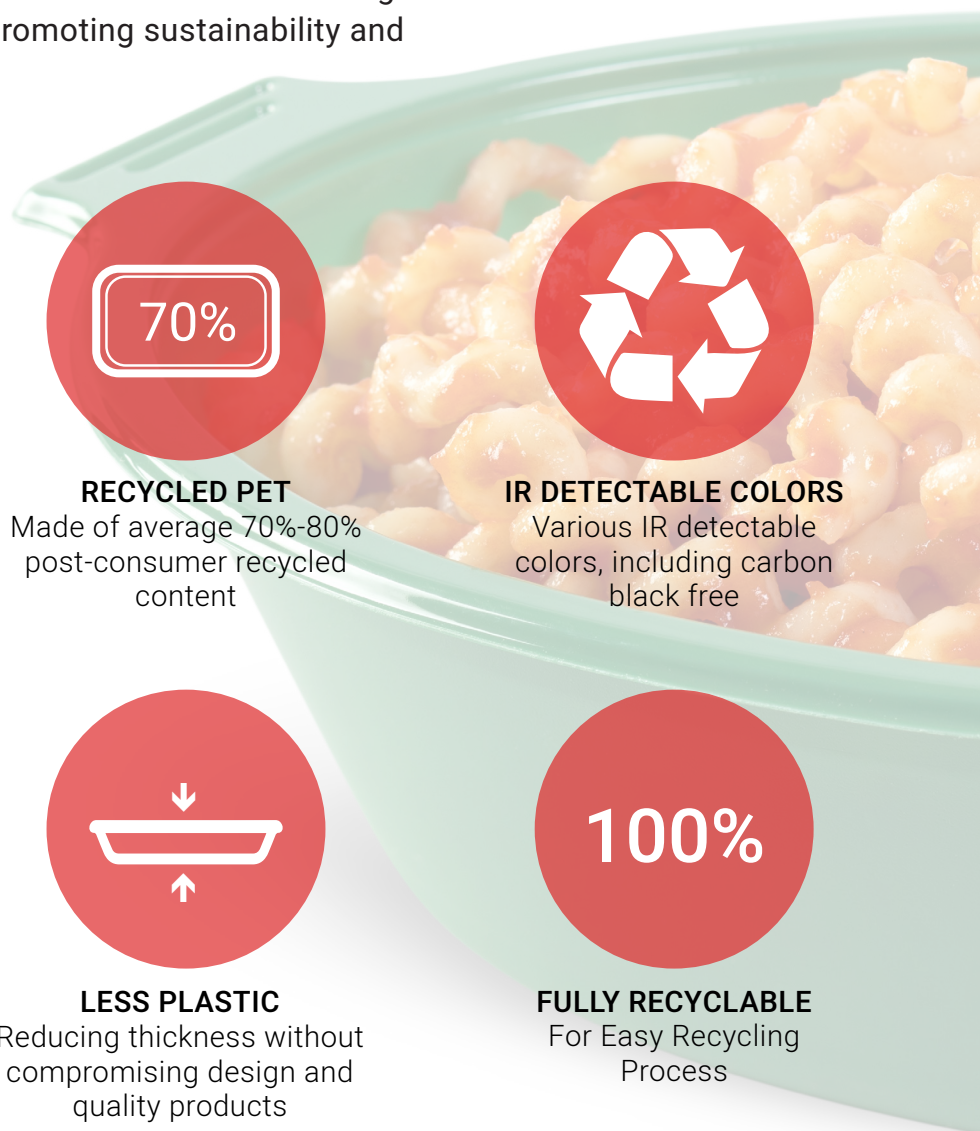

**NON COLOR/NON PIGMENT**  
Non colored trays for easy sorting

**LESS PLASTIC**  
Reducing thickness without compromising design and quality products

**FULLY RECYCLABLE**  
For Easy Recycling Process

## APPLICATIONS

RePET trays are the optimal solution for practically any food storage or service application

Retail Ready Meals

Meals On Wheels

School Meals (World Food Program)

Meals On-Board (Aviation)

Healthcare Meals

# MCP PACKAGING SOLUTIONS COMMITTED TO YOUR BRAND

At MCP, we pride ourselves on offering our customers a seamless and comprehensive service experience, from initial design to mass production. Our dedicated sales and R&D teams work closely with you every step of the way, ensuring that your packaging design is brought to life efficiently and effectively. We understand the importance of bringing your products to market quickly, which is why we minimize tooling costs and maintain short lead times, ensuring that your time to market is optimized.

MCP has joined the MPP group, which comprises of four manufacturing sites in Israel, specializing in providing a wide range of rigid packaging solutions for various industries, by utilizing state-of-the-art technology and expertise. The group offers the following products and solutions:

- × RePET trays, containing up to 70%-80%, recycled CPET material in various colors and shapes, for sustainable packaging solutions worldwide. They are dual-ovenable trays that are suitable for heating in both microwave and conventional ovens and able to withstand temperatures from as low as -40°C to as high as +220°C.
- × PP (Polypropylene ) trays and containers for fresh meat and protein, grab and go, dairy products and other applications.
- × PS/MLPS (Polystyrene/Polystyrene multi-layer) for dairy - yogurt containers and other applications.
- × High-barrier solutions for the fresh food industry.
- × Various sheet rolls for packaging machines.
- × Special finishing to make sure that your products stand out on the shelves:
  - × Shrink Sleeve Labels
  - × Banderole Stickers
  - × Direct printing up to 8 colors

MCP, founded in Kibbutz HaMa'apil, is known for being the leading manufacturer of thermo plastic packaging in Israel, with a reputation of over 50 years.
